REVIEW OF NEW INDUSTRIES

Past Three Months Show Most Gratifying Growth in Southern Development.

Chattanooga, Tenn., Oct. 6.—The current issue of the Tradesman, under mailing date of October 1, presents its quarterly review of southern industrial progress for the three months' period ending with September 30, in which a most gratifying condition of business is shown. The total of new industries established during this quarter is 1,540, against 1,368 for the corresponding quarter last year, an increase of 172. In the number of new industries for the quarter, wood-working plants lead with 238, and next in numerical importance are compresses and gins of which there were 111. The record shows 84 new mines and quarries open, 73 electric light and power plants established, 70 development and improvement companies organized, 69 new natural gas and oil concerns, etc.

The accompanying list, compiled and authorized by The Tradesman, demonstrates the industrial progress of the Southern States for the week ending Wednesday, showing the principal new industries established in each state and their character. Oklahoma comes to the front with a new mining company capitalized at one million dollars. Among the concerns of more than ordinary financial weight is also to be noted a new coal and timber company at Alexandria, Va., whose capital stock is placed at a half million dollars. The week's record shows no cessation of activity in the south, but a continued perseverance along every avenue of permanent development.

PENSACOLA'S WATER IS PURE

Analysis Shows That No Danger Need Be Apprehended from That Source.

A few weeks ago while there was an unusual amount of typhoid fever in the city, the Mayor being anxious to locate the cause, sent two samples of city water to Bacteriologist Ed. Andrade, at Jacksonville through Dr. Porter.

A thorough analysis was made, and the Mayor received a reply which readily demonstrated the fact that the trouble was at least not with the city water. The letter was as follows:

The Analysis.
Jacksonville, Fla., Aug. 26, 1905.
Dr. Joseph Y. Porter, State Health Officer, Pensacola, Fla.

Dear Doctor—I beg to submit report on examination of water sent by Hon. Chas. H. Bliss, Mayor.

Sample from "Tank on Grounds" contains no excess of ammonia. Amount of Chlorine—0.4 per 100,000. No. of bacteria in each C. C.—3300. No bacillus coli communis or any other intestinal bacteria.

Sample from Faucet at Police Station contains no excess of ammonia. Amount of Chlorine—0.2 per 100,000. 100,000.

No. of bacteria in each C. C.—70. No B. coli communis or any other intestinal bacteria.

From the foregoing analysis I consider the water free from infection but if it continues to be suspected I think advisable to examine more samples.

Yours truly,
ED. ANDRADE,
(Bacteriologist).

Some Seasonable Advice.
It may be a piece of superfluous advice to urge people at this season of the year to lay in a supply of Chamberlain's Cough Remedy. It is almost sure to be needed before winter is over, and much more prompt and satisfactory results are obtained when taken as soon as a cold is contracted and before it has become settled in the system, which can only be done by keeping the remedy at hand. This remedy is so widely known and so altogether good that no one should hesitate about buying it in preference to any other. It is for sale by all druggists.

GOOD USE FOR PEARL EAGAN HOME

IT HAS BEEN FITTED UP AS A DETENTION PLACE FOR CHILDREN WHILE FEVER IS HERE.

The Pearl Eagan Home has been taken in charge by some of the best people in town who will conduct it as a detention place for children, an institution that is greatly needed, during the existence of yellow fever in the city.

For instance, when the parents or other adult members of a family are ill and unable to take care of the children, or when other members have a contagious or infectious disease, the little ones will be cared for at the Pearl Eagan Home, free from all danger.

The building has been thoroughly renovated and put in condition to make the little ones comfortable and every effort will be made to keep them cheerful and happy.

The Home will be open and ready for business this evening, and will no doubt prove a blessing in many ways, not only to the children but to anxious parents that their little ones are being well cared for during their separation.

The Committee would like to have the ladies who can do so interest themselves in this impromptu home for the children. The ladies can do a great deal towards the comfort and welfare of little ones by merely going there to see that they have all that is needed for them.

Jennie May, who has charge of the place, is a thoroughly reliable person and the children are in good hands.

This move on the part of the committee is a worthy one and should be encouraged by every one. Persons desiring further information may get it by applying to Mr. D. Hale Wilson or any other member of the committee.

BEWARE OF BUBONIC PLAGUE.
No other agent has done so much to spread the bubonic plague as rats from plague ridden countries and foreign ports. In Manila, the authorities have purchased large quantities of Stearns' Electric Rat and Roach Paste, and are making a vigorous fight, determined to kill every rat within the city limits.

This Paste is easy to use, and is greedily devoured by rats, roaches and all vermin, driving them out of the house to die.

The sale is rapidly increasing, and it can be obtained almost everywhere. If your dealer does not have it, it will be sent express prepaid on receipt of the price by Stearns' Electric Paste Co., Chicago, Ill. Small size 25c, hotel size, \$1.00.
